WLC 400

MLO 6

The sixth and final Major Learning Outcome for Spanish majors at California State University, Monterey Bay is Information Technology Literacy. Upon graduating we are to demonstrate the ability to use technology to support our scholarly work. The deliverables that demonstrate my fulfillment of this MLO are the Capstone powerpoint presentations and the electronic graduation portfolio. For the Capstone presentation we are to create and use both a Spanish and English Powerpoint for the presentations given in front of the faculty, students and public. For graduation we are also to create an outline portfolio using HTML format, that includes electronic versions of various components such as MLO essays, an unofficial transcript and a Resume. These assignments have given my extensive practice using various forms of technology to facilitate my education.
